

## IT Tech support intern – Job Description

### About KLKE:

KeyleerKorb Enterprises (KLKE) is a global supplier of passive and active electronic components, pharma & medical supplies. KLKE also provides sourcing, supplying, and servicing furnace for steel industries. KLKE was incorporated in 2020 and is incubated by the GRASS Foundation with offices in Dresden (Germany), Chennai & Mayiladuthurai (Tamil Nadu, India). KLKE works closely with the public and private stakeholders around the world to deliver quality products based on their requirements with short lead-time and comprehensive customer support.

### KLKE as an Employer:

KLKE is a flat hierarchical organization with ease of communication, work-life balance and a conducive work environment being the core tenets of the company culture. KLKE promotes personal growth through mandatory training and capacity building initiatives. KLKE seeks to be a fair and empowering employer with inclusive human resource policies that ensures an empowering workspace that is democratic, dignified, and diverse.

### About the Position:

KLKE is currently strengthening its IT infrastructure to meet the needs of our growing business. Against this, KLKE is seeking internship candidates for supporting front-end and back-end web development. The candidate will assist with troubleshooting issues and provide relevant technical support in areas such as programming, analytics, and data management. The position will be full-time and online based or based out of our offices in Dresden, Germany and Mayiladuthurai, Cuddalore (Tamil Nadu, India).

### Roles and Responsibilities:

- Participating in the entire application lifecycle, focusing on coding and debugging
- Writing efficient code for company website development
- Creating user interface by using standard HTML/CSS practices
- Collaborate with Front-end developers to integrate user-facing elements with server-side logic
- Integrating the data from various backend services and databases
- Backing-up files from web to local directories for recovery
- Development of SEO activities under the guidance of technical head
- Resolve conflicts, prioritize needs, and develop content criteria in guidance with the technical head
- Testing the code to make sure it meets industrial standard and compatible with all types of browsers, OS, and devices

### Experience and Qualifications

- Degree/Course in Web development or related field, or relevant experience in Django.

- Solid knowledge in database, programming, and web development.
- Working knowledge in Full stack Web developing which can equally contribute to both client and server side
- Proficiency with front end languages such as java script, HTML and CSS
- Basic knowledge in Search Engine Optimization
- Excellent analytical and problem-solving skills
- Flexible, self-motivating, able to manage multiple tasks efficiently
- Experience in working independently and as part of a team
- Excellent written and oral communication skills in English

Salary: Competitive by industry standards
